PHILOSOPHICAL MAGAZINE B, 1992, VOL. 65, NO. 6, 1465–1474

SUBJECT INDEX

Vol. 65

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters

	PAGE
Aerogels, colloidal, structure and dynamics of	339 B
Aerogels, silica, structure and dynamics of	347 B
Ag, diffusion of, in AgSn	207 A
AgI superionic glasses	173 B
AgSn, self-diffusion of Ag in	207 A
Al alloy, creep deformation of	943 A
AlCoCu, decagonal formation in	55 L, 85 L
AlCoNi, quasicrystals in	33 L
$Al_{65}Cu_{20}Cr_{15}$, icosahedral phase of	421 B
Al_5CuLi_3, shear planes in	1395 A
AlFeCu, phase transition in	7 L
Al/GaAs bicrystals, interface atomic structures of	385 B
AlGaAs systems, vibrational structure in	325 B
AlLiCu, quasicrystalline, dislocations in	189 L
Alloys, segregated, magnetic equation of state for	1149 B
AlMn decagonal quasicrystals	525 B
$Al_{70}Ni_{10}Co_{20}$ quasicrystals, dislocations in	203 L
$Al_{75}Ni_{10}Fe_{15}$ quasicrystals, dislocations in	203 L
Al_2O_3, amorphous, electron energy loss in	1445 A
Al_2O_3, growth of Fe_2O_3 on	439 A
Al_2O_3Fe oriented interfaces	299 L
AlPdMn, quasicrystals in	25 L
AlPdMn icosahedral phase	147 L
Al_3Ti, iron-doped, dislocations in	245 A
Al_5Ti_2Fe, dislocations in	389 A
$Al_{66}Ti_{25}Mn_9$, tensile deformation of	91 A
Alumina, friction and microplasticity in	1187 A
Amorphous Al_2O_3, electron energy loss in	1445 A
Amorphous $CrSiO_2$, activated conduction in	651 B
Amorphous semiconductors, photoluminescence in	733 B
Amorphous SiH, defects and H bonding in	1025 B
Amorphous SiH, transport and recombination in	945 B
Amorphous silica fibres and tips, flow in	43 L
Amorphous silicon, Hall coefficient	225 L
Amorphous silicon, photoconductivity in	739 B
Amorphous silicon FETs, kinetics in	953 B
Amorphous SiNi:H, hopping conduction in	675 B
Anderson model, non-degenerate	1165 B
Angle-resolved electron energy-loss spectra	1127 A
Anomalous diffusion, scale invariance in	755 B
Anomalous yield stress in Ll_2 alloys	569 A
Antiphase boundaries in a B2 ordered compound	477 A
Antiphase domain boundary tubes	287 A
As precipitates in GaAs	981 A
As_2S_3, photodoping of Ag in	67 L
Atomic displacements due to vacancies	749 A

PAGE

Atomic magnetic moments of FeCr alloys . . . . . 183 L
Atomic transport, review of . . . . . 1287 A
Attractor neural networks, optimization of . . . . . 1303 B
AuFe, changes in magnetic regime of . . . . . 1231 B
AuFe alloys, spin dynamics of . . . . . 1223 B

B2 ordered compounds, antiphase boundaries in . . . . . 477 A
BaCuO(Nd,Sm,Tm), magnetic transition in . . . . . 1381 B
Bardeen–Herring dislocation climb source . . . . . 321 L
$Be_{12}Nb$, deformed, dislocations in . . . . . 1083 A
Benzophenone, ultrasonic studies of . . . . . 1021, 1033 A
Bimaterials, thermoelastic stresses in . . . . . 1049 A
Binary h.c.p. alloys, ground state structures in . . . . . 967 B
Bipolaron theory of high T_c superconductors . . . . . 219 L
Blackman sum rule, deviation from . . . . . 1135 B
Bond-particle model for semiconductors . . . . . 921 B
Borate glasses, superionic . . . . . 143 B
Bubble rafts, two-dimensional . . . . . 895 B

C_{60}, doped, superconductivity in . . . . . 1419 B
Capacitance, negative, in metal–insulator–metal devices . . . . . 47 B
Carbon–chromium coatings, microstructure in . . . . . 167 L
Carrier trapping, relaxation kinetics of . . . . . 729 B
Cascades, irradiation-induced, point defects in . . . . . 889 A
$C_{60}C_{70}$, defects in . . . . . 283 L
Cd(S,Se) quantum dots in silicate glasses . . . . . 243 L
CdMnTe:In, dielectric constant in . . . . . 1245 B
CeCu and YbCu, uncommon substitution effects in . . . . . 1319 B
CePtSi, low temperature properties of . . . . . 1349 B
Ceramic formation of yttrium barium cuprate . . . . . 29 B
$CeRu_2$ and ZrV_2, superconducting . . . . . 1445 B
CeRuSiGe alloys, intersite interactions in . . . . . 1357 B
Charge transfer molecular dynamics . . . . . 489 B
Charge transport in molecular solids . . . . . 831 B
Charge trapping in SiH/SiO_2 transistors . . . . . 177 L
Chromium–carbon coatings, microstructure in . . . . . 167 L
Clathrate SiNa, transitions in . . . . . 1435 B
Climb motion and rate limitations during irradiation . . . . . 53 A
Cluster, percolating, vibrational dynamics of . . . . . 243 B
Clusters, percolation, transport in . . . . . 749 B
Colloidal aerogels, structure and dynamics of . . . . . 339 B
Composites, metal, internal stresses in . . . . . 1217 A
Compton profiles in TiNi alloys . . . . . 553 B
Conductance, tunnelling, and Coulomb gap . . . . . 681 B
Conductance in the hopping regime . . . . . 595 B
Conduction in granular metals . . . . . 855, 867 B
Continuum dislocations, simulation of . . . . . 311 A
Convergent beam diffraction, dislocation contrast in . . . . . 863 A
Copper, heterogeneous deformations in . . . . . 707 A
Copper indium diselenide, conduction in . . . . . 843 B
Copper oxide superconductors, spin polarons in . . . . . 767 B
Correlated electrons in disordered systems . . . . . 695 B
CoTi, dislocations in . . . . . 29 A
Coulomb gap, review and new developments . . . . . 657 B
Coulomb gap and tunnelling conductance . . . . . 681 B
Coulomb staircase in SiGe . . . . . 701 B
Cr precipitation in NiAlTiCr alloys . . . . . 961 A
$CrSiO_2$, amorphous, activated conduction in . . . . . 651 B

PAGE

Creep cavitation, growth of . . . . . 71 A
Creep deformation of an Al alloy . . . . . 943 A
Creep in LiF . . . . . 757 A
Cross slip in deformed $Ni_3(Al,Ti)$ . . . . . 195 L
Crystallization in SiC . . . . . 1 B
CuAlNi martensitic transformations in . . . . . 461 A
Cu_3Au, order–disorder transition in . . . . . 913 A
Cubic material, elastic interactions in . . . . . 797 A
CuMn, flow stress in . . . . . 1463 A
Cu_3Pt, strength of . . . . . 737 A
CuTiZr, glass formation in . . . . . 989 B
CuXMn, magnetic and thermal properties of . . . . . 1283 B
CuZn, deformed, dislocations in . . . . . 815 A

Decagonal formation in AlCoCu . . . . . 55 L
Decagonal phases of AlCuCo . . . . . 85 L
Decagonal system, orthorhombic phases of . . . . . 107 B
Decahedra, structure and energetics of . . . . . 1079 B
Deformation and fracture, role of dislocations in . . . . . 149 A
Deformation and stress correlations . . . . . 1419 A
Deformation in Ti_3Al . . . . . 233 L
Deformations, heterogeneous, in Cu . . . . . 707 A
Density of states and localization . . . . . 1097 B
Diagonally disordered systems, conductivity in . . . . . 745 B
Diamond, dislocations in . . . . . 657 A
Diamond, helical dislocations in . . . . . 159 L
Diamond thin films, photoconductivity in. . . . . 105 L
Dielectric constant in CdMnTe:In . . . . . 1245 B
Diffusion, anomalous, scale invariance in . . . . . 755 B
Diffusion and segregation of grain boundaries . . . . . 277 A
Diffusion of grain boundaries . . . . . 133 L
Diffusion of oxygen and water in silica . . . . . 463 B, 155 L
Dimensionality in high T_c superconductors . . . . . 1373 B
Disclinations in an elastically anisotropic solid. . . . . 1429 A
Dislocation bias during irradiation . . . . . 53 A
Dislocation climb source, Bardeen–Herring . . . . . 321 L
Dislocation contrast in convergent beam diffraction. . . . . 863 A
Dislocation controlled cracking in GaAs . . . . . 131 A
Dislocation dipoles in InP. . . . . 121 L
Dislocation lozenges and dipoles in f.c.c. crystals . . . . . 841 A
Dislocation-mirror-twin-boundaries in YBaCuO . . . . . 427 A
Dislocation mobility in InP . . . . . 195 A
Dislocation movements through random obstacles . . . . . 111 A
Dislocation networks in graphite . . . . . 853 A
Dislocations, continuum, simulation of . . . . . 311 A
Dislocations, helical, in diamond . . . . . 159 L
Dislocations, misfit, in quasicrystals . . . . . 211 L
Dislocations, quasicrystalline . . . . . 1 L
Dislocations, screw, in Ni_3Al . . . . . 1327 A
Dislocations, superlattice, in NiAl . . . . . 41 A
Dislocations and stresses in deformation and fracture . . . . . 149 A
Dislocations in $Al_{70}Ni_{10}Co_{20}$ quasicrystals . . . . . 203 L
Dislocations in Al_5Ti_2Fe . . . . . 389 A
Dislocations in CoTi . . . . . 29 A
Dislocations in deformed $Be_{12}Nb$ . . . . . 1083 A
Dislocations in deformed CuZn . . . . . 815 A
Dislocations in deformed SiC . . . . . 551 A
Dislocations in deformed $Ti_3Al/TiAl$ . . . . . 1065 A

PAGE

Dislocations in HCl-doped ice . . . . . 85 A
Dislocations in intermetallics . . . . . 1095 A
Dislocations in iron-doped Al_3Ti . . . . . 245 A
Dislocations in $Ni_3(Si,Ti)$ . . . . . 41, 613 A
Dislocations in quasicrystalline AlLiCu . . . . . 189 L
Dislocations in SiGe alloys . . . . . 1369 A
Disorder in a stochastic lattice gas . . . . . 231 B
Disordered chain, electron transport along . . . . . 639 B
Disordered solids, hopping and phonons in . . . . . 607 B
Disordered solids, Raman and Brillouin scattering in . . . . . 161 B
Disordered systems, correlated electrons in . . . . . 695 B
Disordered systems, vibrational transport in . . . . . 289 B
Disordered systems, workshop on . . . . . 141 B
Dispersive transient transport in percolation clusters . . . . . 501 B
Displacement field of antiphase domain boundary tubes . . . . . 287 A
Displacement thresholds in sapphire . . . . . 355 A

Einstein model of thermodynamics of KBr . . . . . 261 L
Elastic interactions in cubic material . . . . . 797 A
Elastic–plastic materials, strain history in . . . . . 531 A
Elastically anisotropic solid, disclination in . . . . . 1429 A
Electrodes of LaNi and LaNiCu, order–disorder in . . . . . 1485 A
Electron damaging of hydroxyapatite . . . . . 665 A
Electron diffraction, thermal diffuse scattering in . . . . . 559 B
Electron energy-loss, angle-resolved . . . . . 1127 A
Electron glass transition in semiconductors . . . . . 685 B
Electron transport along a disordered chain . . . . . 639 B
Ellipticity in In . . . . . 267 L
Energy spectrum from isothermal measurements . . . . . 1053 B
Energy transport in disordered oscillatory systems . . . . . 273 B
Entropy of fluctuating moments at low temperatures . . . . . 1185 B
Europium in gel-derived silica glasses . . . . . 251 B

Fatigue, role of vacancies in . . . . . 177 A
F.c.c. crystals, dislocations in . . . . . 841 A
Fe, In embedded in, solidification of . . . . . 1041 B
FeAlCr intermetallics, fracture of . . . . . 1407 A
Fe(Al,Ni), effect of proton irradiation on . . . . . 497 A
$FeAl_2O_3$ oriented interfaces . . . . . 299 L
FeCr, atomic magnetic moments of . . . . . 183 L
FeCr multilayers, magnetization of . . . . . 1235 B
Fe_3Ge, yield strength in . . . . . 1003 A
Fe_2O_3, growth of on Al_2O_3 . . . . . 439 A
Fe_3Si, thermophysical properties of . . . . . 1215 B
FeSi alloy, ordering below the tricritical point . . . . . 255 L
Flow stress in CuMn . . . . . 1463 A
Fluctuating moments, entropy of . . . . . 1185 B
Fluctuations in high T_c superconductors . . . . . 1405 B
Fluctuations, magnetoconductance . . . . . 1131 B
Fluctuations in mesoscopic systems . . . . . 707 B
Flux pinning in high field superconductors . . . . . 1451 B
Four-dimensional crystallography . . . . . 49 L
Fractal aspects of superionic glasses . . . . . 261 B
Fractals, random, vibrations and random walks on . . . . . 191 B
Fracture of FeAlCr intermetallics . . . . . 1407 A
Friction and microplasticity in alumina . . . . . 1187 A
Fullerenes, $C_{60}C_{70}$, defects in . . . . . 283 L

PAGE

GaAs, As precipitates in . . . . . 981 A
GaAs, dislocation controlled cracking in . . . . . 131 A
GeAsTe glasses, critical composition in . . . . . 249 L
GeAsTe glasses, photoacoustics in . . . . . 99 B
GeSi epilayers, strain and stability of . . . . . 1151 A
Glass formation in CuTiZr . . . . . 989 B
Glasses, doped, spin Hamiltonian of . . . . . 401 B
Glasses, GeAsTe, critical composition in . . . . . 249 L
Glasses, ionic migration relaxation in . . . . . 153 B
Glasses, soft localized vibrations in . . . . . 303 B
Grain boundaries, low-energy configurations of . . . . . 513 A
Grain boundaries in ice . . . . . 279 L
Grain boundaries in NiCu . . . . . 625 A
Grain boundary diffusion . . . . . 133 L
Grain boundary segregation and heterodiffusion . . . . . 277 A
Grain growth, scaling theory of . . . . . 141 L
Granular metal films, transport in . . . . . 357 B
Graphite, dislocation networks in . . . . . 853 A
Growth of creep cavitation . . . . . 71 A
Growth of crystals from metallic fluxes . . . . . 1117 B

H.c.p. alloys, binary, ground state structures in . . . . . 967 B
He bubbles in titanium tritides . . . . . 1235 A
Helium bubble growth in nickel . . . . . 77 L
Hf in SiC, bond formation of . . . . . 1001 B
Hole–phonon coupling in high T_c superconductors . . . . . 775 B
Hopping, variable range, in the Coulomb gap . . . . . 647 B
Hopping, variable range, in two-dimensional systems . . . . . 715 B
Hopping and phonons in disordered solids . . . . . 607 B
Hopping and related phenomena . . . . . 593 B
Hopping conductance in copper indium diselenide . . . . . 843 B
Hopping conductivity in disordered systems . . . . . 745 B
Hopping in amorphous indium oxide . . . . . 669 B
Hopping regime, conductance in . . . . . 595 B
Hopping regime, small polaron, in disordered systems . . . . . 631 B
Hopping transport, percolation in . . . . . 627 B
Hopping transport in 1D random media . . . . . 615 B
Hopping transport in strong electric fields . . . . . 621 B
Hot electrons following ion implantation . . . . . 101 L
Hume-Rothery–Jones phases, solute elements in . . . . . 1125 B
Hydrogen in polysilane . . . . . 535 B
Hydroxyapatite, electron damage in . . . . . 665 A

Ice, grain boundaries in . . . . . 279 L
Ice, HCl-doped, dislocations in . . . . . 85 A
Icosahedral phase of $Al_{65}Cu_{20}Cr_{15}$ . . . . . 421 B
Icosahedral phase of AlPdMn . . . . . 147 L
Icosahedral phases in MgGaAlZn . . . . . 1011 B
Icosahedral R-$A_{15}CuLi_3$ phase, structure of . . . . . 311 L
In, ellipticity in . . . . . 267 L
In embedded in Fe, solidification of . . . . . 1041 B
Indium oxide, amorphous, hopping in . . . . . 669 B
InGaAs/GaAs quantum wells, dislocations in . . . . . 829 A
InP, dislocation dipoles in . . . . . 121 L
InP, dislocation mobility in . . . . . 195 A
Interface atomic structures of Al/GaAs bicrystals . . . . . 385 B
Intergranular failure in iron aluminides . . . . . 129 L
Intermetallic compounds, lattice cleavage in . . . . . 215 A

PAGE

Intermetallics, dislocations in . . . . . 1095 A
Intermetallics, stacking faults in . . . . . 273 L
Intersite interactions in CeRuSiGe alloys . . . . . 1357 B
Iodine-doped polyacetylene films conductivity of . . . . . 789 B
Ion-bombarded yttrium iron garnet, transport in . . . . . 873 B
Ion-implanted Si:As, transport in . . . . . 849 B
Ion-irradiated polyimide films, conductivity of . . . . . 783 B
Ionic migration relaxation in glasses. . . . . 153 B
Iron, magnetic form factors of . . . . . 37 B
Iron aluminides, intergranular failure in . . . . . 129 L
Isothermal measurements, energy spectrum from . . . . . 1055 B

KBr, thermodynamic properties of . . . . . 261 L

LaNi and LaNiCu electrodes, order–disorder in . . . . . 1485 A
Lattice cleavage in intermetallic compounds . . . . . 215 A
Lattice dynamics, Blackman sum rule of . . . . . 1137 B
Lattice gas, stochastic, disorder in . . . . . 231 B
Lattice relaxation following ion implantation . . . . . 101 L
LiF, creep in . . . . . 757 A
Ll_2 alloys, anomalous yield stress in . . . . . 569 A
Localization and the density of states . . . . . 1097 B
Localization in superlattices, disorder-induced . . . . . 213 B
Long-period pendulums . . . . . 261 A
Low temperature properties of CePtSi . . . . . 1349 B

Magnetic and lipid bubbles . . . . . 895 B
Magnetic and thermal properties of CuXMn . . . . . 1283 B
Magnetic defects in MnNi . . . . . 1191 B
Magnetic equation of state for an alloy . . . . . 1149 B
Magnetic form factors of iron by X-rays . . . . . 37 B
Magnetic ordering in UNi_4B . . . . . 1343 B
Magnetic regime of AuFe, changes in . . . . . 1231 B
Magnetic transition in BaCuO(Nd,Sm,Tm) . . . . . 1381 B
Magnetization of FeCr multilayers . . . . . 1235 B
Magnetoconductance fluctuations . . . . . 1131 B
Magnetoresistance in doped semiconductors . . . . . 723 B
Martensitic transformations in CuAlNi . . . . . 461 A
Matter transport, transport coefficients for . . . . . 1169 A
Mb and W in f.c.c. transition metals. . . . . 1249 A
Memory shape effect, modelling of . . . . . 1199 A
Mesoscopic systems, fluctuations in . . . . . 707 B
Metal films, granular, transport in . . . . . 357 B
Metal–insulator transition in NdH alloys . . . . . 127 B
Metal–insulator–metal devices, negative capacitance in . . . . . 47 B
Metal matrix composites, internal stresses in . . . . . 1217 A
Metal particles, structure and energetics of . . . . . 1079 B
Metallic fluxes, growth of crystals from . . . . . 1117 B
Metallic re-entrant systems . . . . . 1267 B
Metals, granular, conduction in . . . . . 855, 867 B
$MgAl_2O_4$ formation and MgO/Al_2O_3 interfaces . . . . . 403 A
MgGaAlZn, icosahedral phases in . . . . . 1011 B
MgO/Al_2O_3 interfaces and $MgAl_2O_4$ formation . . . . . 403 A
MnNi, magnetic defects in . . . . . 1191 B
Molecular dynamics, charge transfer. . . . . 489 B
Molecular solids, charge transport in . . . . . 831 B
Molecularly doped polymers, transport in . . . . . 795 B
$MoSi_2$, tetragonal, twins in . . . . . 1339 A

PAGE

NdH alloys, electrical behaviour of . . . . . 127 B
Neo-Eulerian orientation map . . . . . 1141 A
Ni_3Al, screw dislocations in . . . . . 1327 A
NiAl, superlattice dislocations in . . . . . 1 A
$Ni_3(Al,Ti)$, deformed, cross-slip in . . . . . 195 L
NiAlTiCr alloys, Cr precipitation in . . . . . 961 A
Ni_4Mo, ordered structure in . . . . . 327 A
$Ni_3(Si,Ti)$, dislocations in . . . . . 613 A
Nickel, helium bubble growth in . . . . . 77 L
Nickel-based superalloy, dislocations in . . . . . 1383 A
Nickel-based superalloys, stacking faults in . . . . . 1383 A
NiCu, twist grain boundaries in . . . . . 625 A
NiFeBSi alloys, critical exponents of. . . . . 1159 B
$NiFe_2O_4$ precipitates in NiO . . . . . 1503 A
NiO, precipitates of $NiFe_2O_4$ in . . . . . 1503 A
NiSb, quenched-in vacancies in. . . . . 71 L
Noble metals and alloys, vacancies in . . . . . 1263 A
Nonlinear two-site model, localization in . . . . . 887 B
Normal grain growth, scaling theory of . . . . . 141 L

Obstacles, random, dislocation movement through . . . . . 111 A
Order–disorder transition in Cu_3Au . . . . . 913 A
Orientation map, neo-Eulerian . . . . . 1141 A
Orthorhombic phases of decagonal system . . . . . 107 B
Oscillatory systems, disordered, energy transport in . . . . . 273 B
Oxidation-induced stacking faults in silicon . . . . . 783 A
Oxygen ordering and Fe configuration in YBaCuFeO . . . . . 931 A

Paramagnetic spectral response in $YbAl_2$ . . . . . 1333 B
Pd, surface plasmon–polaritons in . . . . . 1141 B
$PdAl_2O_3$ interfaces, structure of . . . . . 363 A
Pendulums, long-period . . . . . 261 A
Percolating cluster, vibrational dynamics of . . . . . 243 B
Percolation clusters, dispersive transient transport in . . . . . 501 B
Percolation clusters, transport in . . . . . 749 B
Percolation in moderate-field hopping transport . . . . . 627 B
Phase transformation in zirconia . . . . . 683 A
Phosphate glasses, superionic, mechanical loss spectra of . . . . . 317 B
Photoacoustics in GeAsTe glasses . . . . . 99 B
Photoconductance in Si:H/SiO:H multilayers. . . . . 79 B
Photoconductivity in diamond thin films . . . . . 105 L
Photoluminescence in solid solutions . . . . . 733 B
Plateau borders in the two-dimensional soap froth . . . . . 473 B
Point defects in irradiation-induced cascades . . . . . 889 A
Polyacetylene films, iodine-doped, conductivity of . . . . . 789 B
Polyimide films, ion-irradiated, conductivity of. . . . . 783 B
Polymers, coped, charge transport in . . . . . 795 B
Polymers, transport in . . . . . 811, 817 B
Polysilane, hydrogen in . . . . . 535 B
Protein powders, hydrated, proton conductivity in . . . . . 861 B
Proton conductivity in hydrated protein powders . . . . . 861 B
Proton irradiation, effect of on Fe(Al,Ni) . . . . . 497 A
Proton-irradiated steels, interstitial loops in . . . . . 1309 A
Proximity effects, use of to induce superconductivity . . . . . 1425 B

Quantum wells, dislocations in InGaAs/GaAs . . . . . 829 A
Quantum wires, semiconductor, phonon emission rate in . . . . . 173 L
Quasicrystalline Al_6Li_3Cu, defects in . . . . . 15 B

PAGE

Quasicrystalline AlMn . . . . . 525 B
Quasicrystalline dislocations . . . . . 1 L
Quasicrystalline TiMn . . . . . 435 B
Quasicrystals, misfit, dislocations in . . . . . 211 L
Quasicrystals in AlCoNi . . . . . 33 L
Quasicrystals in AlFeCu . . . . . 7 L
Quasicrystals in AlPdMn . . . . . 25 L
Quasiperiodic lattices in four dimensions . . . . . 49 L

R-Al_5CuLi_3 icosahedral phase, structure of . . . . . 311 L
Raman and Brillouin scattering in disordered solids . . . . . 161 B
Random media, hopping transport in . . . . . 615 B
Reactance in time-varying dielectric systems . . . . . 65 B
Re-entrant systems . . . . . 1267 B
Refractive index of dry SiO_2 . . . . . 961 B
Relaxation in spin glasses . . . . . 1309 B
Relaxation kinetics of carrier trapping . . . . . 729 B
Resistivity, effect of spin fluctuations on . . . . . 1197 B
Resistivity cross-over for Anderson model . . . . . 1165 B

Sapphire, displacement thresholds in . . . . . 355 A
Sapphire, TiO_2 on, defects and interfaces in . . . . . 1103 A
Semiconductor quantum wires, phonon emission rate in . . . . . 173 L
Semiconductors, bond-particle model for . . . . . 921 B
Semiconductors, doped, magnetoresistance in . . . . . 723 B
Semiconductors, electron glass transition in . . . . . 685 B
Shape memory effect, modelling of . . . . . 1199 A
Shape-memory in TiNiFe . . . . . 123 A
Shear planes in Al_5CuLi_3 . . . . . 1395 A
Si, surface structure of . . . . . 95 L
Si : As, ion-implanted, transport in . . . . . 849 B
SiC, crystallization in . . . . . 1 B
SiC, deformed, dislocations in . . . . . 551 A
SiC, Hf in . . . . . 1001 B
SiGe, Coulomb staircase in . . . . . 701 B
SiH, amorphous, defects and H bonding in . . . . . 1025 B
SiH, amorphous, transport and recombination in . . . . . 945 B
SiH/SiO_2 transistors, charge trapping in . . . . . 177 L
Si : H/SiO : H multilayers, photoconductance in . . . . . 79 B
Silica, amorphous, diffusion of oxygen and water in . . . . . 155 L
Silica, diffusion of oxygen and water in . . . . . 463 B
Silica aerogels, structure of . . . . . 181, 347 B
Silica fibres and tips, amorphous flow in . . . . . 43 L
Silica glasses, trivalent europium in . . . . . 251 B
Silicate glasses, Cd(S,Se) quantum dots in . . . . . 243 L
Silicon, amorphous, FETs, kinetics in . . . . . 953 B
Silicon, amorphous, Hall coefficient in . . . . . 225 L
Silicon, amorphous, photoconductivity in . . . . . 739 B
Silicon, stacking faults and gettering in . . . . . 783 A
Silver, photodoping of in As_2S_3 . . . . . 67 L
SiNa clathrates, transitions in . . . . . 1435 B
SiN : H, amorphous, hopping conduction in . . . . . 675 B
SiO_2, dry, refractive index of . . . . . 961 B
Small polaron hopping regime in disordered systems . . . . . 631 B
Soap froth, two-dimensional, Plateau borders in . . . . . 473 B
Sol-gel zirconia, characterization of . . . . . 771 A
Solid solutions, tweed and twin formation in . . . . . 15 L
Solute elements in Hume-Rothery–Jones phases . . . . . 1125 B

PAGE

Spin dynamics of AuFe alloys . . . . . 1223 B
Spin fluctuations, effect of on resistivity . . . . . 1197 B
Spin glasses, relaxation in . . . . . 1309 B
Spin glasses, theory of for attractor neural networks . . . . . 1303 B
Spin glasses and superconductors . . . . . 1293 B
Spin Hamiltonian of doped glasses . . . . . 401 B
Spin polarons and copper oxide superconductors . . . . . 767 B
Spin-glasses, noble metal, thermoelectric power of . . . . . 1275 B
Stacking faults in intermetallics . . . . . 273 L
Steels, proton-irradiated, interstitial loops in . . . . . 1309 A
Stiffness and stress coefficients . . . . . 227 A
Strain and stability in GeSi epilayers . . . . . 1151 A
Strain history in elastic–plastic materials . . . . . 531 A
Strength of ordered Cu_3Pt . . . . . 737 A
Stress and deformation correlations . . . . . 1419 A
Stress and stiffness coefficients . . . . . 227 A
Strong coupling in YBaCuO . . . . . 1389 B
Superalloy, nickel-based, dislocations in . . . . . 1353 A
Superalloys, nickel-based, stacking faults in . . . . . 1383 A
Superconducting YBa(Cu,Au) oxides. . . . . 113 L
Superconducting YBaCu(Fe,Co)O, structures of . . . . . 1067 B
Superconducting YBaCuO, structural control of . . . . . 1395 B
Superconductivity, high T_c, inducement of . . . . . 1425 B
Superconductivity in doped C_{60} . . . . . 1419 B
Superconductors, high field, flux pinning in . . . . . 1451 B
Superconductors, high T_c, dimensionality in . . . . . 1373 B
Superconductors, high T_c, fluctuations in . . . . . 1405 B
Superconductors, high T_c, hole–phonon coupling in . . . . . 775 B
Superconductors, high temperature, bipolaron theory of . . . . . 219 L
Superconductors and spin glasses . . . . . 1293 B
Superionic borate glasses . . . . . 143 B
Superionic glasses, AgI-based . . . . . 173 B
Superionic glasses, fractal aspects of . . . . . 261 B
Superionic phosphate glasses, mechanical loss spectra of . . . . . 317 B
Superlattice dislocations in NiAl . . . . . 1 A
Superlattices, disorder-induced localization in . . . . . 213 B
Surface plasmon-polaritons in Pd . . . . . 1141 B
Surface structure of Si . . . . . 95 L

t-J model, two-dimensional, transport in . . . . . 881 B
Tensile deformation of $Al_{66}Ti_{25}Mn_9$ . . . . . 91 A
Thermal diffuse scattering in electron diffraction . . . . . 559 B
Thermoelastic stresses in bimaterials . . . . . 1049 A
Thermoelectric power of noble metal spin glasses . . . . . 1275 B
Thermophysical properties of Fe_3Si . . . . . 1215 B
Ti_3Al, deformation in . . . . . 233 L
TiAl, twinning in . . . . . 15 A
Ti_3Al/TiAl, deformed, dislocations in . . . . . 1065 A
Tilt grain boundaries, low-energy configurations of . . . . . 513 A
TiMn, quasicrystalline . . . . . 435 B
TiNi alloys, Compton profiles in . . . . . 553 B
TiNiFe shape-memory alloy . . . . . 123 A
TiO_2 on sapphire, defects and interfaces in . . . . . 1103 A
Titanium tritides, He bubbles in . . . . . 1235 A
Transport, atomic, review of . . . . . 1287 A
Transport, hopping, in strong electric fields . . . . . 621 B
Transport coefficients for matter transport . . . . . 1169 A
Transport in polymers . . . . . 811, 817 B

PAGE

Tricritical point in FeSi, ordering below . . . . . 225 L
Tweed and twin formation in solid solutions . . . . . 15 L
Twinning in TiAl . . . . . 15 A
Twins in tetragonal $MoSi_2$ . . . . . 1339 A
Two-dimensional *t-J* model, transport in . . . . . 881 B
Two-site model, nonlinear, localization in . . . . . 887 B

Ultrasonic studies of benzophenone . . . . . 1021, 1033 A
UNi_4B, magnetic ordering in . . . . . 1343 B

Vacancies, quenched-in, in NiSb . . . . . 71 L
Vacancies, role of in fatigue . . . . . 177 A
Vacancies in noble metals and alloys . . . . . 1263 A
Vacancy mechanism for atomic displacements . . . . . 749 A
Variable range hopping in the Coulomb gap . . . . . 647 B
Variable range hopping in two-dimensional systems . . . . . 715 B
Vibrational structure in AlGaAs systems . . . . . 325 B
Vibrational transport in disordered systems . . . . . 289 B
Vibrations, soft localized, in glasses . . . . . 303 B
Vibrations and random walks on random fractals . . . . . 191 B

W and Mb in f.c.c. transition metal alloys . . . . . 1249 A

YBa(Cu,Au)O superconductors, magnetic flux pinning in . . . . . 113 L
YBaCu(Fe,Co)O, structures of . . . . . 1067 B
YBaCuFeO, oxygen ordering and Fe configuration in . . . . . 931 A
YBaCuO, dislocation-mirror-twin-boundaries in . . . . . 427 A
YBaCuO, microstructure control of . . . . . 1395 B
YBaCuO, specific heat of . . . . . 1389 B
$YbAl_2$, paramagnetic spectral response in . . . . . 1333 B
YbCu and CeCu, uncommon substitution effects in . . . . . 1319 B
Yield strength in Fe_3Ge . . . . . 1003 A
Yttrium barium cuprate, chemical nature of . . . . . 29 B
Yttrium iron garnet, ion-bombarded, transport in . . . . . 873 B

Zirconia, phase transformations in . . . . . 683 A
Zirconia, sol-gel, characterization of . . . . . 771 A
ZrV_2 and $CeRu_2$, superconducting . . . . . 1445 B

PHILOSOPHICAL MAGAZINE B, 1992, VOL. 65, NO. 6, 1475–1493

INDEX OF AUTHORS (WITH TITLES)

Vol. 65

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters
